ABOUT THE SECURITY SUMMIT

Security 5.0: The Future of AI-Driven Security Management is a power-packed summit that brings together leading minds in technology, surveillance, & infrastructure to explore the transformative role of Artificial Intelligence in the security domain. From predictive threat detection and generative AI in video analytics to ethical governance and human-AI collaboration in SOCs, this event will offer practical insights, expert panels, and real-world use cases. Designed for security professionals, tech leaders, and decision-makers, the summit aims to uncover how AI is reshaping the future of secure operations across critical sectors.

CHIEF GUEST

LT GEN PJS PANNU **PVSM, AVSM, VSM (RETD)**

A distinguished military leader, Lt Gen PJS Pannu played a pivotal role in shaping India’s tri-services operational command. He was instrumental in establishing the Defence Space Agency, Cyber Agency, and Special Forces Division. As the architect of IndSpaceX 2019 – India’s first space warfare exercise – he demonstrated foresight in integrating emerging technologies into national defence.

With international experience as Chief Operations Officer in UN missions in Mozambique and Sudan, he brings a global strategic outlook. He has also served as Chairman of CENJOWS and USI, India’s premier defence think tanks, and continues to contribute as a respected author and thought leader on national security and disruptive defence technologies.

KEYNOTE SPEAKER

GURPAWAN SINGH **PRESIDENT, IIRIS**

With over 28 years of experience in risk management, forensic analysis, & organizational consulting, Gurpawan Singh is a value-driven leader known for creating impact & driving innovation across diverse and complex domains. As the President of IIRIS Consulting, he provides strategic direction & leadership, ensuring the delivery of high-quality, tailored solutions to clients across multiple sectors and geographies. His extensive expertise continues to shape transformative outcomes in the field of enterprise risk and advisory services.

SPEAKER

The logo for Blue & Gray, featuring the words "BLUE" and "GRAY" in white capital letters, separated by an ampersand, on a dark blue background.

ORGANISED BY

Blue and Gray Management Consultancy Pvt. Ltd. is a premier strategic marketing and business development firm specializing in the safety, electrical, and infrastructure sectors. With deep domain expertise and influential networks across India and the Middle East, the firm delivers insight-driven, outcome-focused solutions that help clients establish authority, expand market presence, and engage the right stakeholders. From brand positioning, corporate events, and high-impact video production to strategic campaigns, podcasts, and regional representation, Blue and Gray offers end-to-end services tailored for impact. As a powerhouse in corporate outreach, the firm has successfully conducted over 40 high-caliber seminars and technical conferences in just two years, including marquee collaborations with NFE and the Bureau of Indian Standards. Through partnerships with leading manufacturers, institutions, and industry bodies, Blue and Gray plays a transformative role in shaping industry narratives, building credibility, and accelerating growth through curated engagement platforms and strategic storytelling.

KNOWLEDGE PARTNER

Duranc Tech Services Pvt Ltd, established in 2014, is a Hyderabad based IT services company specializing in advanced video surveillance solutions. Their flagship product, Duranc Vision, is a cloud-based platform that integrates with existing IP cameras to deliver real-time analytics and business insights. The platform is compatible with various devices and network configurations, ensuring seamless integration. It offers scalable and flexible solutions, allowing businesses to add multiple locations & cameras with ease. Security is a priority, with features like centralized monitoring and end-to-end encryption. Duranc serves diverse industries, including retail, education, healthcare, & manufacturing, providing tailored surveillance solutions. Their AI-driven video analytics enhance operational efficiency & security across sectors. With a presence in India, the USA, and Finland, Duranc has executed over 250 projects globally. Their commitment to innovation positions them as a leader in transforming surveillance systems into strategic assets.

POWERED BY

IIRIS Consulting is a globally recognized risk management and intelligence firm, delivering cutting-edge solutions across enterprise risk, resilience, security, and crisis management. With a mission to help organizations thrive in an increasingly volatile world, IIRIS integrates advanced analytics, on-ground intelligence, and strategic foresight to craft customized, actionable risk frameworks. Their expertise spans risk assessments, business continuity planning, cyber and physical security audits, regulatory compliance, crisis preparedness, and geopolitical risk advisory. With a multidisciplinary team of domain experts and a global network, IIRIS supports clients across corporates, governments, infrastructure, and high-risk sectors, helping them anticipate disruptions and respond with agility. Known for their evidence-led methodology and deep regional insights, IIRIS has become a trusted partner for organizations looking to enhance resilience, protect assets, and safeguard long-term business value in dynamic risk environments.

SUPPORTED BY

ASIS International – New Delhi Chapter is a part of the global ASIS International community, the world's leading organization for security professionals. The New Delhi Chapter serves as a platform for security practitioners across sectors to engage, collaborate, and advance their knowledge in corporate security, risk management, crisis response, and emerging technologies. Through regular workshops, networking events, and certification support (such as CPP, PSP, and PCI), the chapter helps build professional excellence and fosters a strong community of security leaders across North India. It actively promotes global best practices while addressing local challenges in the Indian security landscape.
